

Flow Transmitter

Key Features

- **Accuracy in Measurement** - In closer tolerance of 0.1% for special applications to monitor precise product management.
- **Freedom from Maintenance** - A single long lasting moving part in the entire system making it almost maintenance free.
- **Operating Range Ability** - 10% to 200%
- **Repeatability** - Accurate repeatability for longer periods.
- **Multidirectional** - Bi-Directional flow Measurement.
- **Pressure Drop** - Can work even under low gravity head hence negligible pressure drop.
- **Visibility of Readings** - Readings visible at night or in poor light from a distance of up to 10 feet because of the large LCD displays.
- **Multitasking** - Handles a variety of liquids from 0.5 to 10,000 CST viscosity.
- **Food Grade** - Can be used on almost all food products.
- **Operating Pressure** - Our standard systems itself can withstand line pressure up to 20 kgs/cm sq.
